

What is claimed is:

1. A select-call administration system administrating calls pertaining to select phone calls between calling terminals and receiving terminals, the select-call administration system comprising:

select-call notification means for notifying a receiving terminal that a call from a calling terminal is a select phone call;

correspondence information acquisition means for 10 acquiring correspondence information based on receiving-terminal correspondence to a call from a calling terminal; and

point-award presentation means for creating point information based on correspondence information acquired by 15 said correspondence information acquisition means and presenting awards based on said point information.

2. A select-call administration system according to claim 1, wherein said select-call notification means displays transmitting-terminal identification information on 20 the receiving terminals.

3. A select-call administration system according to claim 1, wherein said transmitting-terminal identification information is a telephone number beginning with predetermined numerals established for said select phone 25 call.

4. A select-call administration system according to  
claim 1, characterized by carrying out a voice announcement  
that a call from a calling terminal is a select call.

5. A select-call administration system according to  
5 claim 1, wherein said select-call notification means  
incorporates into a messaging signal and transmits message  
information to the effect that a call from a calling  
terminal is a select phone call.

6. A select-call administration system according to any  
10 of claims 1 through 5, wherein based on the correspondence  
information said point-award presentation means adds  
predetermined points to a point value set for a receiving  
terminal having received a call pertaining to a select phone  
call.

15 7. A select-call administration system according to  
claim 6, further comprising point information storage means  
for administrating point values set for the receiving  
terminals.

8. A select-call administration system according to  
20 claim 7, wherein based on point information administrated by  
said point information administration means said point-award  
presentation means discounts fees charged to the receiving  
terminals.

9. A select-call administration system according to  
25 claim 7, wherein said point-award presentation means:

is provided with a merchandise information table in which point information and product information are corresponded; and

5 merchandise from the merchandise information table.

10. A select-call administration system according to  
any of claims 1 through 5, wherein based on the  
correspondence information said point-award presentation  
means adds predetermined points to a point value set for a  
third party apart from the calling terminals and the  
receiving terminals.

11. A select-call administration system according to  
any of claims 1 through 10, wherein said point-award  
presentation means based on the point information charges  
15 fees to a calling terminal having transmitted a call  
pertaining to a select phone call.

12. A select-call administration system according to any of claims 1 through 11, wherein the correspondence information is call length of a select call.

20 13. A select-call administration system according to  
any of claims 1 through 12, wherein the correspondence  
information is operational information pertaining to  
operational content in the receiving terminals.

14. A select-call administration system according to  
25 either claim 12 or 13, further comprising point information

notification means for reporting, to the calling terminal and the receiving terminal having completed a select phone call, point information created based on the call pertaining to the select call.

5 15. A select-call administration system according to claim 14, wherein said point information notification means reports the point information via voice announcement.

10 16. A select-call administration system according to claim 14, wherein said point information notification means transmits character information for displaying the point information on display devices on the calling terminals and the receiving terminals.

17. A select-call administration system according to any of claims 1 through 16, further comprising:

15 point information setting means for presetting points added to a point value for a receiving terminal when in response to a call from a calling terminal a select phone call has taken place;

20 point prior-notification means for notifying a receiving terminal, during issuance of a phone call from a calling terminal, of point information set by said point information setting means; and

25 receive-call selection means for a receiving terminal to select in response to a phone call from a calling terminal whether or not a select phone call takes place.

18. A select-call administration system according to  
claim 17, wherein said point information setting means  
accepts points-to-be-issued information issued from the  
calling terminals.

5 19. A select-call administration system according to  
claim 18, wherein said receive-call selection means is  
provided with:

10 receive-call condition acceptance means for accepting  
receive-call conditions from the receiving terminals to  
permit select calls on the receiving terminal end; and  
receive-call rejection means for comparing with the  
receive-call conditions points-to-be-issued information  
issued from a calling terminal and disconnecting a call from  
the calling terminal.

15 20. A select-call administration method administrating  
calls pertaining to select phone calls between calling  
terminals and receiving terminals, the select-call  
administration method comprising:

20 a step of notifying a receiving terminal that a call  
from a calling terminal is a select phone call;  
a step of acquiring correspondence information based on  
receiving-terminal correspondence to a call from a calling  
terminal; and  
a step of creating point information based on  
25 correspondence information acquired by said correspondence

information acquisition means and presenting awards based on said point information.

21. A select-call administration method according to claim 20, further comprising a step for reporting, to the 5 calling terminal and the receiving terminal having completed a select phone call, point information created based on the call pertaining to the select call.

22. A select-call administration method according to claim 20, further comprising:

10 a step of presetting point information created when a select phone call has taken place in response to a call from a calling terminal;

15 a step of notifying a receiving terminal, during issuance of a call from a calling terminal, of the preset point information; and

a step of prompting a receiving terminal to select in response to a call from a calling terminal whether or not a phone call takes place.

23. A select-call administration method according to 20 claim 20, comprising:

a step of accepting receive-call conditions from the receiving terminals to permit select calls on the receiving terminal end; and

a step of comparing with the receive-call conditions points-to-be-issued information issued from a calling terminal and disconnecting a call from the calling terminal.

## 24. A program for a select-call administration method

5 administrating calls pertaining to select phone calls  
between calling terminals and receiving terminals, the  
program for executing on a computer the select-call  
administration method comprising:

a step of notifying a receiving terminal that a call

10 from a calling terminal is a select phone call;

a step of acquiring correspondence information based on receiving-terminal correspondence to a call from a calling terminal; and

a step of creating point information based on

15 correspondence information acquired by said correspondence information acquisition means and presenting awards based on said point information.

## 25. A program for a select-call administration method

administering calls pertaining to select phone calls between calling terminals and receiving terminals, the program for executing on a computer the select-call administration method comprising:

a step of notifying a receiving terminal that a call from a calling terminal is a select phone call;

a step of acquiring correspondence information based on receiving-terminal correspondence to a call from a calling terminal:

5 a step of creating point information based on  
correspondence information acquired by said correspondence  
information acquisition means and presenting awards based on  
said point information; and

a step of reporting, to the calling terminal and the receiving terminal having completed a select phone call, point information created based on the call pertaining to the select call.

26. A program for a select-call administration method  
administering calls pertaining to select phone calls  
between calling terminals and receiving terminals, the  
15 program for executing on a computer the select-call  
administration method comprising:

a step of presetting point information created when a select phone call has taken place in response to a call from a calling terminal;

20 a step of notifying a receiving terminal that the call  
from the calling terminal is a select phone call;

a step of notifying the receiving terminal, during issuance of the call from the calling terminal, of the preset point information;

47-32257-5  
a step in response to the call from the calling terminal of prompting the receiving terminal to select whether or not the phone call takes place;

5 a step of acquiring correspondence information based on receiving-terminal correspondence to the call from the calling terminal; and

10 a step of creating point information based on correspondence information acquired by said correspondence information acquisition means and presenting awards based on said point information.

27. A program for a select-call administration method administrating calls pertaining to select phone calls between calling terminals and receiving terminals, the program for executing on a computer the select-call 15 administration method comprising:

a step of accepting receive-call conditions from the receiving terminals to permit select calls on the receiving terminal end;

20 a step of presetting point information created when a select phone call has taken place in response to a call from a calling terminal;

a step of notifying a receiving terminal that a call from the calling terminal is a select phone call;

25 a step of comparing with the receive-call conditions points-to-be-issued information issued from the calling

terminal and disconnecting the call from the calling terminal.
